WHAT PROBLEMS WE SEE...

No Central Place to store Contracts/ signed Documents

Regulatory Compliance is not being effectively tracked.

Version Control & Legacy Contract are generally not traceable

Any negligence in negotiating contracts or renewals can result in penalties in Business world.

Organizations needs a solution that integrates with their existing application.

There is no guarantee whether a signed contract document is valid.

HOW WE PLAN TO SOLVE THEM…

1.Creates workflows-based use case(s)

2.Customized template and Conditional Template

3.Workflow can be shared with multiple Parties for Contract Creation

4.Traceability of every step taken during contract/document creation process

5.APIs to integrate with many applications, including Tendring, Procurement, and HRMS Applications

6.QR code-based verification to check contract details

7.Document vault – secure storage of your Contracts

VALUE PROPOSITIONS…

30%-50% Time Savings

- ✓ With workflow-based approach of Verifiable contract , contract creation becomes very fast and easy. and it helps companies to create contract in minutes and close deal faster.
- ✓ These time savings can range from 30-50% depending upon the complexity of the contract and stake holders involved.

QR-Code Verification

- ✓ With a QR code embedded upon each contract, its validity and authenticity can be checked at any given point of time with a simple scan.

Data Driven Insights

- ✓ Contract data can be utilised to make informed business decisions and identify opportunities for optimization.
- ✓ This will in return create new revenues

Increased Revenue

- ✓ Improved contract management and renewal processes, reducing revenue leakages and ensuring contracts are not missed nor forgotten.
- ✓ Enabling cross-selling and upselling opportunities by tracking contract performances and customer relationships about them.
